SUMMARY

Python Developer with 3+ years of experience building scalable RESTful APIs and ETL pipelines across backend and data engineering. Skilled in Django, Flask, FastAPI, PostgreSQL, and NoSQL databases, with hands-on experience on AWS and Azure. Proven track record of automating manual workflows, orchestrating data pipelines with Airflow, and applying AI-assisted development to speed up delivery without compromising code quality.

SKILLS

Languages: Python, SQL

Frameworks: Django, Django REST Framework, Flask, FastAPI

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Snowflake

Data Engineering: Apache Airflow, Airbyte, PySpark, Databricks, ETL Pipeline Design

Cloud & DevOps: AWS (Lambda, S3, Key Vault), Azure, Docker, GitHub Actions, Kafka

Practices: REST API Design, CI/CD, Microservices, System Architecture, API Integration

EXPERIENCE

Associate Developer | *Times Internet, Noida*

Aug 2025 – April 2026

- Built an automated tracking system for Google Ad Manager (GAM) lines and orders, replacing a decade-old manual process — cutting processing time by 30x while holding 100% KPI accuracy.
- Built a real-time campaign monitoring dashboard (Flask + Jinja), cutting status-check email threads and speeding up QA turnaround for the team.
- Used AI-assisted development tools to speed up backend development, debugging, and data-processing workflows.
- Ran development in cloud-based environments to shorten prototyping-to-deployment cycles and improve iteration speed.

Associate Developer — Viral Nation Platform & Secure, NCS Multistage | *Oodles Technologies, Gurugram* **Dec 2021 – May 2024**

- Built and maintained backend systems in Python using Django and Django REST Framework across multiple client projects.
- Designed and shipped RESTful APIs powering backend-frontend integration for client applications.
- Managed relational and NoSQL data stores (PostgreSQL, MySQL, MongoDB, DynamoDB) plus data lake storage for high-volume workloads.
- Wrote unit tests and debugged issues to keep systems reliable and performant at scale.
- Partnered with frontend engineers, designers, and product managers to ship end-to-end features.
- Authored API specs and architecture docs used by cross-functional teams.
- Automated multi-step data workflows with Apache Airflow, reducing manual intervention.
- Used Azure and AWS services (Key Vault, Lambda, S3) to build secure, scalable backend infrastructure.

EDUCATION

Bachelor of Engineering — RGPV University

2015 – 2019

STET (State Eligibility Test), BSEB

2019 – 2021

LANGUAGES

English, Hindi
